(54) Title: PLANT POT

(57) Abstract

The invention relates to a plant  
pot comprising a first space bounded  
by a first upright wall and a second  
space bounded by a second upright wall  
and a bottom, which first and which  
second space are separated from each  
other by a porous plate. The plant pot  
is according to the invention character-  
ized in that a third space bounded by  
a third upright wall and a bottom sur-  
rounds the second space, and in that  
the second space serves to accommo-  
date a moisture-retaining, hydrating but  
air-permeable material.
